WHY RECYCLING DAY?

Our Campus, Our Impact

Every year, our campus produces thousands of coffee cups, bottles, papers, and cans. Most of it ends up in landfills or oceans. Recycling Day is about changing that.

Environmental Impact

- Recycling reduces deforestation
- Cuts plastic pollution
- Lowers greenhouse gas emissions.

Resource Savings

Recycling aluminum saves 95% of the energy compared to producing it new.

Recycling 1 ton of paper saves 17 trees and 7,000 gallons of water.

Campus Responsibility

Universities are hubs of innovation — adopting recycling habits here sets an example for society.

Innovate. Conserve. Sustain.

HOW TO RECYCLE DAY ON CAMPUS

We've Made It Simple!

CANS BIN

Soda cans
Energy drink cans
Metal packaging

PLASTIC BIN

Cold coffee cups
Water bottles
Plastic lids
Food containers

PAPER BIN

Notebooks
Flyers
Cardboard sleeves

Innovate. Conserve. Sustain.

Sustainability

BEYOND THE BIN:
WHY IT MATTERS

Recycling is more separating trash – it's building circular economy where resources or reuses, not wasted.

Cleaner Campus

Less litter and clutter in student areas.

Healtheier Cities

Cuts toxic emissions and keeps less s wateways clean.

Future-Proofing

Supports Vision 2030 goals and sustainable communities.

Global Movement

Germany recycles 65% of its waste, Sweden sends less than 1% to landfills, and Japan sorts into 10+ categories. Our university can be part of this global shift.

Innovate. Conserve. Sustain.

Recycling Day Activities by Sustainability Club

Information Booth

Learn about recycling and scan a QR code instead of paper brochures.

Recycling Station

Test your recycling skills by tossing items (bottle, paper cup wrapper) into the correct bin.

Origami Station

Volunteers will teach origami using scrap paper collected from printers and offices

Digital Pledge Board

Leave virtual sticky note pledging one habit you'll change.

Innovate. Conserve. Sustain.
